Condition at time of delivery	Male	Female	Total
Severe degree of party	5	1	6
Slight or no party	15	10	25
Total	20	11	31

Probable foal sex was determined during time of delivery using the following criteria:

- Positive blood test for  $Y$  (1972)
- At least 7 mm of groove

Chi square = 13.2

Table shows the required condition for time of delivery with sex of foal.
